

Year in Review

NOON

COVID - 19

As COVID-19 turned our world upside-down, we endeavored as a company to provide our customers with products that could help facilitate health and safety in public-facing environments. Essential businesses such as grocers, convenience stores, and food service turned to idX for creative, reliable, and sanitary solutions to keep their associates and patrons safe. Our organization quickly shifted focus from traditional manufacturing to providing protective solutions to consumer-facing essential retailers. Our new acrylic partitions have customizable installation options for every environment and are a durable solution to facilitate socially-distanced person-to-person interactions.

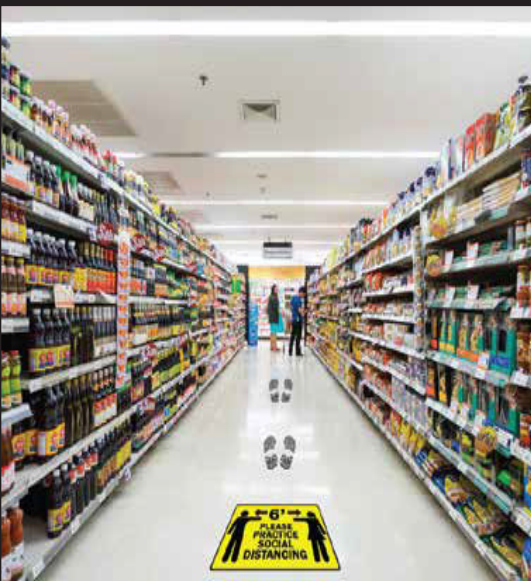

THANK YOU!

Our teams around the world worked tirelessly to develop solutions for our customers, remain safe in the midst of a global pandemic, and are the essential element of our company's success. We celebrate their hard work this last year as we further serve our customers.
